

# Vacuum Type

## BUNDLE NOTE COUNTING MACHINE

Vacuum Type Note Counting machines MDC-10 (Desktop) and MFC-10 (Floor) bring in unprecedented efficiency and accuracy in your currency counting operations- be it a bank, a financial institution, post office, railway ticket counter or a busy retail shop. Built with State of the Art design and stringent quality control, these rugged machines are workhorses that serve you longer with minimum maintenance. Hundreds of machines are running at various banks and other locations.

**MEGA**

## VACUUM TYPE BUNDLE NOTE COUNTING MACHINES

**MEGA**

**Speed** : Counts 100 notes in 3.8 seconds.  
Overall throughput 1200 notes/minute.

### Four modes of operation :

**Free** : Counts given stack of notes.  
**Check** : Counts and verifies with preset check quantity.  
Machine locks in case of error.  
**Add** : Series of counts added and total displayed.  
**Batch** : Counts and separates preset quantity. Machine locks up for removal of separated notes.

### Other Features :

**Auto/Manual** : Choice of manual or automatic start of counting.  
**Audio** : Choice of audio beep at the end of counting and alarm beeps for failed check or batch count.  
**OK Stamp** : Choice of OK printing after successful check count (optional).

### Ease of Use

User interface panel display current count as well as total/target count. LED indication of mode. Full numeric keypad with separate mode keys ease operation. Additional customer display shows current count.

### Count Totalizer

Machine can remember counts done in last 2-3 months – helps automating preventive maintenance call generation.

### Batch/Check Flexibility

Program any check number and batch number between 1-99. Better still, input any batch number during counting. Current check/batch numbers are displayed-so no confusion ever.

### Diagnostics

Built-in diagnostic programs check each and every part of the system to quickly identify and rectify machine malfunction.
